-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicants' submission filed on 10/9/2003 has been entered.
2. Claims 8, 10, 11, 60, and 61 are under consideration in this Office Action.

Claim Rejections - 35 U.S.C. § 112, 1st Paragraph

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:
The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
4. Claims 8, 10, 60 and 61 stand rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.
Applicants' arguments filed 10/9/2003 have been considered but are not persuasive. Applicants' position is that the specification discloses screening methods, specifically, penicillin screening method used to concentrate *Rhodococcus* strains defective or reduced in growing with benzamide as the sole carbon/nitrogen source, and that one of skill in the art thus would recognize that Applicants' were in possession of the invention. The Examiner respectfully disagrees for reasons of record as supplemented below.
The specification only provides a written description of how to search and screen for the claimed invention. The specification does not provide a written description of all possible mutant microorganisms which convert any cyano group into a any carboxyl group and are defective or reduced in converting a any cyano group into an any amide group. The specification, however, only provides a written description of a single representative species encompassed by these claims, specifically, a *Rhodococcus* sp. SD826 (FERM BP-7305) strain.

Claim Rejections - 35 U.S.C. § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 8 stands rejected under 35 U.S.C. 102(a) as being anticipated by Kato et al. Applicants' arguments filed 10/9/2003 have been considered but are not persuasive.

Kato et al. teach that upon heat treated, *Rhodococcus* sp. strain YH3-3 contains an nitrile hydratase which is reduced to **55% activity** and in absence of facts to the contrary inherently has an active nitrilase which converts a cyano group into a carboxyl group (see p. 253, right column, 3.2 *Microbial dehydration of E-pyridine-3-aldoxime by the heat-treated cells of Rhodococcus sp. Strain YH3-3, lines 37-44*). Thus, the reference teachings anticipate the claimed invention since the claims do not recite the limitation that the claimed invention cannot be heat-treated.

Conclusion

7. Claim 11 is allowed.
